Thus Yamauchi has been excluded from being available prior art. There is no prior art of record that teaches a dual display mode LC device, comprising first and second substrates, a first polarizer on an outer surface of the first transparent substrate, a front light unit on an outer surface of the first polarizer, a selective transmission/reflection part on an outer surface of the second substrate, and a second polarizer on an outer surface of the selective transmission/reflection part. The limitation of "on an outer surface" is interpreted as requiring direct contact between the part that is "on an outer surface of" thus the prior art fails to teach the claimed structure because it teaches additional elements between. Yamauchi has taught previously of removing some of these elements
